Description

As part of ongoing research into online communities, we are working with an online platform investigating how the composition of the community members impacts participation in the community. To this end, we want to evaluate several online profiles (pictures, bio description, etc.) along dimensions such as physical attractiveness, skills, and potential role models. Your task will be to review and assign a score to each profile.

Who we are

This research is being conducted by the Crowd Innovation Lab at Harvard University, <http://projects.iq.harvard.edu/crowdinnovationlab/home>.

Risks and Benefits

There are no anticipated risks to you from participation in this experiment. There are no direct benefits to you from the research itself. Please consider this when deciding to participate.

Costs and Payments

There are no costs to you for participation in this research study. As consideration for your participation, we will pay you a \$10 Amazon gift card.

Confidentiality

The scores you give will not be made public.

Right to withdraw

You do not have to take part in this research study and that you have the right to withdraw from the experiment at any time. Simply notify us of your desire to withdraw, and we will no longer use your profile. You also may be removed from the experiment by the investigators at any time.

To participate, you must be:

- US citizen or permanent resident
- 18 years of age or older
- fluent in English
- comfortable using a computer
